

ABSTRACT

Title: 2007-2012 Mississippi River Regional Planning Commission Comprehensive Economic Development Strategy

Author: Mississippi River Regional Planning Commission

Subject: This report covers the economic development conditions, needs, trends and strategies for the nine county Mississippi River Region in western Wisconsin

Date: April 2007

Purpose: Since 1976 the County Board of Supervisors of Buffalo, Crawford, Jackson, La Crosse, Monroe, Pepin, Pierce, Trempealeau and Vernon have cooperated annually to develop this report through the Mississippi River Regional Planning Commission (MRRPC) for the purpose of fostering regional economic development. The report documents our Region's history, current conditions, economic challenges and actions we can take to improve our region's environment, economy, and quality of life. By preparing and member counties participating in the development of this report, the nine county Mississippi River Region maintains its Economic Development District designation conferred upon it by the U.S. Department of Commerce-Economic Development Administration (EDA). This district designation qualifies the region's counties, communities, institutions and businesses to be eligible for EDA assistance under its public works and economic development facilities program, technical (research) assistance programs, loan programs, and planning programs. Throughout the years millions of dollars in Federal EDA grants have funded industrial parks, economic research studies, public facility projects and business loans through this partnership.
